

This code is a random team generator that automatically assigns players into different teams based on user input. The program uses string manipulation and loops to process player names entered as a single string, counts the total number of players, and applies conditional statements to validate the setup. It also uses mathematical expressions and the modulo operator to distribute players among teams in a pseudo-random manner using a user-provided seed number. The final output displays each player along with their assigned team.

```
In [6]: print('Random Team Generator')

names_inpt = input('Enter player names (separated by spaces): ')
names_inpt = names_inpt.strip()

player_count = 0
current_name = ""

for char in names_input:
    if char != " ":
        current_name = current_name + char
    else:
        if current_name != "":
            player_count = player_count + 1
            current_name = ""

if current_name != "":
    player_count = player_count + 1

print('Total players detected:', player_count)

if player_count < 2:
    print('Error: You need at least 2 players to form teams.')
else:
    teams = input('How many teams do you want to create? ')
    try:
        num_teams = int(teams)
    except:
        print('Invalid input. Defaulting to 2 teams.')
        num_teams = 2

    seed = input('Enter any random number to mix the teams: ')
    try:
        seed = int(seed)
    except:
        seed = 42

    print('Team Assignments')

    current_name = ""
    player_number = 0

    for char in names_input:
        if char != " ":
            current_name = current_name + char
```

```
    else:
        if current_name != "":
            team_assignment = ((player_number + seed) % num_teams) + 1
            print(current_name, '-> Team', team_assignment)

            player_number = player_number + 1
            current_name = ""

    if current_name != "":
        team_assignment = ((player_number + seed) % num_teams) + 1
        print(current_name, '-> Team', team_assignment)

print('Generation Completed.')
```
